

States' NOVA LAB panels have been specifically formulated for applications requiring enhanced chemical resistance. These panels provide laboratory casework manufacturers with the advantage of pre-finished hardwood in domestic and imported veneer species on a choice of substrates. No-Added-Formaldehyde and FSC Certified constructions are available. NOVA LAB panels are certified to comply with the Scientific Equipment & Furniture Association's

8.0 Cabinet Surface Finish Tests. These include 8.1 Chemical Spot Test, 8.2 Hot Water Test and 8.3 Impact Test. Results can be viewed at www.statesind.com.

Hardwood Panels.

NOVALAB

SEFA COMPLIANT FINISH

SEFA Certified Prefinished Hardwood Panels

Ingenuity, It's in everything we do.

The leader in prefinished hardwood panels now offers SEFA certified laboratory grade finishes in your choice of hardwood veneer species. No-Added-Formaldehyde and FSC Certified constructions are also available.

States' NOVA LAB is formulated and applied specifically to exceed the Scientific Equipment & Furniture Association's Cabinet Surface Finish Test, 8.0 in third party testing. Additionally it passes SEFA's Hot Water Test 8.2 and Impact Test 8.3.

Wood laboratory furniture manufacturers and other casework providers whose products are exposed to harsh chemicals will benefit from the superior protection afforded by NOVA LAB's multiple UV fill and triple topcoat applications on open or closed grained species.

States has not compromised the beauty or clarity of its traditional NOVA prefinished panels to achieve NOVA LAB's extraordinary chemical resistance properties. In fact the multiple topcoats enhance panels' depth and richness.

NOVA LAB prefinished panels are available from States in domestic and import species and grades in all thicknesses and substrates. All are available in No-Added-Formaldehyde constructions and most may be ordered FSC Certified

NOVA finishes are 100% solid, ultraviolet cured epoxy acrylate. They contain no formaldehyde and emit no volatile organic compounds in manufacturing or in use. In addition to NOVA LAB's chemical resistance it is extremely durable and may be wiped down with acetone.

The cost advantage of using prefinished hardwood panels is derived from the transfer efficiency of flat line finishing systems and UV's rapid cure rate. Excess finish is recycled while that applied to panels is cured instantaneously. Per square foot finish costs are well below conventionally applied coatings.

States Industries has been the leader in providing prefinished panels since introducing them to the industry in 1992. No other panel manufacturer ships more prefinished panels and no other panel supplier has the experience and dedication to producing high quality prefinished panels. In addition, States offers more finish options than anyone else in the industry, insuring the perfect match of panel and finish tailored to the specific application.

- SEFA Certified prefinished hardwood panels.
- Domestic or import species, all grades & substrates.
- Efficient, UV Cured flatline finish system.
- Multiple fills and triple topcoated.
- NAF and FSC constructions available.
- No volatile organic compounds.
- Lowers costs, speeds up production times
